

# Episode 02 – Using a calculator

European section – season 1

$$2 + 3 - 4 \times 5 + \frac{6}{7}$$

$$2 + 3 - 4 \times 5 + \frac{6}{7}$$

Two plus three minus four times five plus six over seven

$$2 + 3 - 4 \times 5 + \frac{6}{7}$$

Two plus three minus four times five plus six over seven

$$3^4 \times 3^6 = 3^{10}$$

$$2 + 3 - 4 \times 5 + \frac{6}{7}$$

Two plus three minus four times five plus six over seven

$$3^4 \times 3^6 = 3^{10}$$

Three to the power four times three to the power six is equal to three power ten.

$$2 + 3 - 4 \times 5 + \frac{6}{7}$$

Two plus three minus four times five plus six over seven

$$3^4 \times 3^6 = 3^{10}$$

Three to the power four times three to the power six is equal to three power ten.

$$5^2; \sqrt{3}; 7^3$$

$$2 + 3 - 4 \times 5 + \frac{6}{7}$$

Two plus three minus four times five plus six over seven

$$3^4 \times 3^6 = 3^{10}$$

Three to the power four times three to the power six is equal to three power ten.

$$5^2; \sqrt{3}; 7^3$$

five squared ; square root of three ; seven cubed
